Summary

A skilled software developer with over 1 year of experience in backend and front-end technologies. Proficient in developing serverless applications using AWS services like Lambda, S3, SQS, and DynamoDB, with a strong understanding of CQRS architecture and .NET. Experienced in front-end development with React and TypeScript, building responsive, user-friendly interfaces. Adept at API integration, troubleshooting, and optimizing system performance for scalable and reliable solutions.

Experience

- FIRST AMERICAN** 24/09/2023 - PRESENT
Technical Trainee
 - Developed and maintained serverless applications using AWS Lambda, S3, SQS, and DynamoDB with .NET, implementing CQRS architecture for scalable solutions.
 - Wrote code for seamless API logic integration and ensured smooth functionality across AWS services.
 - Managed and optimized backend processes to ensure performance, scalability, and reliability in the serverless environment.
 - Designed and implemented front-end solutions using React and TypeScript, ensuring responsive and user-friendly interfaces.

Projects

- Gamut**
A vendor management system, developing APIs to automate vendor operations using React, .NET, and AWS serverless technologies. Implemented functionality for reading and validating Excel data against DynamoDB and executing vendor-specific actions.

Skills

- Dotnet
- React Js(TS)
- Node Js (TS,Mern stack)
- Java(spring boot with React,microservices)
- Aws (S3,Sqs, Dynamo Db, Lambada)
- SQL(SQL server ,MySQL,Progres) and NoSql (mongodb , dyanamodb)
- Expertize in CRUD APIs

Certifications

- Microsoft Certified Azure AI Fundamentals
- Fullstack Intership Edureka
- Serverless Architecture

Languages

- English
- Hindi
- Marathi

Interests

- Learn about new technologies (web dev)
- Esports
